

Sizmek™

Adhesion

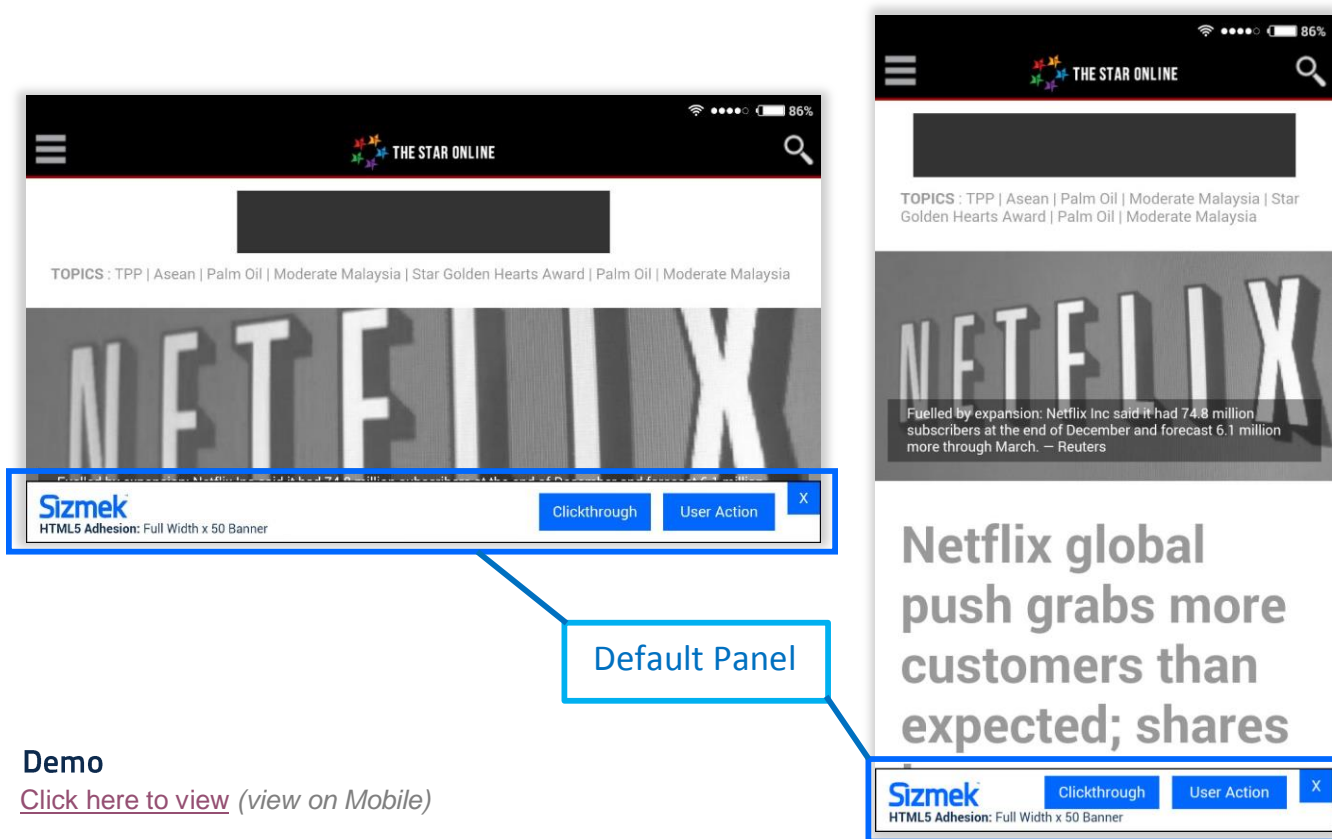

Build Guide

OVERVIEW

User Experience

Adhesion Ad is an Ad format that continually adheres to the bottom of the display while the user scrolls through the page. The Adhesion Ad is an upgrade to the Sizmek Format called "IAB Mobile Adhesion" and expands to the support matrix to cover tablet and mobile devices.

The format contains both non-expandable and expandable templates ([refer here](#)). The banner will always pin to the bottom when user interacts with the page contents. The banner will always appear or can be customized to disappear while user is scrolling the page or rotating the device. The banner also always includes a close button at the top right corner, so user can collapse the ad.

Open source template notes:

The open source ad template is built to the correct Sizmek specifications and can be easily re-skinned. This example is designed to function as described in this kit.

All amendments are up to the individual skill of the creative developer.

Ads built outside Sizmek specs can cause delays and additional costs to the creative agency.

Specification

Creative Assets	Dimension (W x H)	Format	File size	Requirement
